## EDUCATION

### Sri Yn College

Master of Computer Applications MCA

CGPA: 8.32

Narsapur, AP.

sep/2019 - march/2023

### Sri Yn College

MPE Bsc

CGPA: 8.95

Narsapur

july 2016 - may 2019

## EXPERIENCE

### Devzen Software Solutions | Software Analyst Intern

Narsapur | jan/2024 - Present

## SKILLS

Programming Languages: java, html, css, javascript, php  
Libraries/Frameworks: React js, Node js  
Tools / Platforms: Vs code, Eclipse  
Databases: mysql, sql, MongoDB

## PROJECTS / OPEN-SOURCE

### KiranWesleyPhotography | [Link](#)

Html, Css, Javascript

This website is an invaluable resource for photographers, offering a platform to showcase their premium photos while also facilitating slot bookings for shoots. It provides comprehensive information including availability and offers, details about the lenses used, ratings, and customer reviews. Photographers can effectively display their work, allowing potential clients to make informed decisions and easily book their services.

### kuli

html, css, javascript

Developed the Kuli platform with the main aim of bridging the gap between workers seeking employment and vendors in need of skilled individuals for diverse tasks. Kuli serves as a comprehensive job-matching system, catering to the requirements of both workers and vendors across various job categories.

### Yummy Foods

Reactjs, Tailwind CSS

Led the frontend development of a food website using React.js and Tailwind CSS, focusing on creating a modern and visually appealing user interface. Leveraged the component-based architecture of React.js to develop reusable UI elements, enhancing maintainability and scalability. Integrated Tailwind CSS to streamline styling and ensure consistency across the website, resulting in a sleek and responsive design. Implemented features such as real-time search, dynamic filtering, and interactive components to optimize user engagement and navigation experience.

### School Management System

React js, nodejs, tailwindcss, mongodb

Currently leading the development of a comprehensive school management system utilizing React.js, Node.js, MongoDB, and Tailwind CSS. Spearheading the frontend development with React.js, I've designed and implemented an intuitive user interface to facilitate seamless interaction for administrators, teachers, parents, and students. Leveraging Tailwind CSS, I've ensured consistent styling and responsiveness across the application, enhancing usability across devices. On the backend, utilizing Node.js, I've developed robust APIs to manage school data, user authentication, and authorization, ensuring data security and integrity. Integrated MongoDB to store and manage complex data structures efficiently. I've iteratively refined features such as attendance tracking, grade management, and communication tools to meet the unique needs of educational institutions.

## CERTIFICATIONS

- Web development - Udemy.
- Front-End-Development-Libraries - **freecodecamp**

#### HONORS & AWARDS

---

Awarded Medals for First-Class Performance for 3 Years in both Bsc and MCA
